

Diesel TREAT

Product code s8509, Sept 25, 2004

Description ;

Diesel TREAT is a multifunctional Diesel Fuel Additive, being a detergent, dispersant type additive that cleans Injectors whilst providing improved thermal and storage stability.

Diesel TREAT offers prevention of the formation of stable fuel-water emulsions and enhances the performance of Diesel fuels, offering improved fuel economy and reduced exhaust emissions.

Recommendations;

Diesel TREAT should be added at the rate of 1 litre of Diesel TREAT to 1000 litres of Diesel fuel.

Diesel TREAT meets or exceeds ;

When used at the recommended treatment rate, Diesel TREAT helps diesel fuels meet the National Conference on Weights and Measures (NCWM), Engine Manufacturers Association (EMA) and Truck Maintenance Council (TMC) requirements for ;

Injector cleanliness as measured by multiple Cummins L10 Injector Depositing Test (keep clean) Passes.

Multiple Peugeot XUD9 Test (keep clean) Passes.
