

# FormLUBE 10

Product code s4700, March 2022 CK

## Description:

FormLUBE 10 has been formulated as a Low viscosity, mould release fluid which has proven effective in separating concrete from steel and plastic moulds and dies.

For concrete work that is formed. FormLUBE 10 provides a film at the formwork/concrete interface to provide a barrier and minimise blemish to the concrete surface.

FormLUBE 10 active ingredient is 3% by weight fatty acid. The fatty acid reacts to form a soap and provide a thin-film barrier over the surface.

## Features:

- Provides good penetration into moulds.
- Easy to apply via brushing, swabbing or conventional spray systems.
- User friendly when compared to other similar type products.
- Non staining to finished product.
- Excellent release properties.
- Minimum “build up”.
- Competitively priced.

## Typical specifications:

Appearance	amber liquid
Specific Gravity	0.85
Flash Point	100°C
Viscosity @ 40°C	7 cSt

The information contained herein is accurate at the time of this review. However, specifications change from time to time. Ensure specifications meet equipment manufacture requirements.
