

LongLIFE 50

HDD Coolant Pre-Mix (Complete Fill)

Product code s8499, June 10, 2004

Description

LongLIFE 50 is a heavy duty diesel engine Coolant Complete Fill being a low silicate proprietary blend designed to meet the performance requirements of both Automotive and Heavy-duty diesel engines. It is fully compatible with Aluminum and suitable for use in lean burn engines where higher than normal temperatures are achieved in the head and block.

LongLIFE 50 is a blend of LongLIFE 100 coolant in de-mineralized water, mixed at 50% by volume.

When used at this rate in automotive and heavy duty diesel applications, it is warranted for 4 years or 120,000 kilometers

This product meets all the latest specifications and being 95% Ethylene Glycol, mixed at 50% with de-mineralized water it is a true complete fill coolant.
