

Parts Wash

Product code s8116, June 10, 2004

DESCRIPTION

Parts Wash is a High Flash Point, solvent based concentrated degreaser, designed to “sit on” water.

Having a flash point greater than 67° C., makes this product extremely safe to use, whilst outperforming most conventional solvent based degreasers.

This product is not classed as “Flammable Goods”, and Non Hazardous according to Worksafe Australia criteria.

Parts Wash is not water soluble

APPLICATION & DIRECTIONS FOR USE

Parts Wash is designed for cleaning and grease removal from all hard surfaces such as engine components, machinery etc.

For normal use in Parts Wash equipment that require the fluid to stay on top of water.
