

SloGEAR 110

Product code s4650, October 10, 2012

Description;

Synforce SloGEAR series is a range of lubricants with comprehensive extreme pressure and adhesive characteristics for use with slow moving gears, bearings, shafts and chains.

SloGEAR 110 is also a multigrade industrial gear oil that offers advantages over traditional slow flow adhesive lubricants in that it has better "cold start flow" characteristics and offers superior resistance to viscosity change due to increased temperatures

Features;

- Prolongs component life due to the clinging nature of the lubricant.
- Resists throw off reducing contamination of product.
- Resists viscosity change with increased temperatures.
- Contains no free Sulphur.

SloGEAR 110 meets or exceeds;

U.S. Steel 224 ... 51517 part 111 ... API GL-4 ... SAE J2360

Typical properties;

Density	@ 15 deg C.	0.868
Viscosity	cst @ 40 deg C.	110
	cst @ 100 deg C.	14.5
Viscosity Index (typical)		135
Tacky
