

## *SynFLUSH for Engines*

Product code s8568, January 11, 2008

### DESCRIPTION

- ♦ Designed to clean and prepare engine for new motor oil
- ♦ 350 gram of SynFLUSH is added to 5L of "old" engine oil
- ♦ Engine should be run for 5 to 10 minutes to circulate flush
- ♦ Drain engine and fill with new motor oil
- ♦ SynFLUSH removes the difficult to remove sludge and varnish
- ♦ Leaves the engine clean and ready for new oil

### ADVANTAGES

- ♦ Easy to use – top treat "old" motor oil in engine
- ♦ Proven cleaning performance in industry standard engine test for cleanliness, Sequence IIIG test on a GM 3.8L / V6 engine
- ♦ Safe and effective - Formulated with light base oil to carry the special dispersant and detergent additives that actively clean deposits in the engine
- ♦ Cleans and prepares the engine for new oil
- ♦ Contains no hazardous solvent that harm seals
- ♦ Easy to dispose of - waste can be put with recyclable oil
- ♦ Safe enough to use every oil change
