

Wire Roap Lube 220

Product code s4345, March 25, 2009

DESCRIPTION

Synforce Wire Roap Lube 220 is formulated with selected Paraffinic base oils and extreme pressure and antiwear additives resulting in a high performance Roap lubricant.

Synforce Wire Roap Lube 220 is able to penetrate Roap strands to ensure corrosion protection and lubrication throughout the Roap.

Special Tackifying additives offering superior adhesiveness have been used to resist fling off at high speeds.

Benefits

- Reduces fatigue, corrosion and wear on hard working surfaces
- Can be applied through an automatic lubrication system
- Leaves all surfaces with a "film" of lubricant, protectant.
- Easily penetrates deep into the Roap strands.

TYPICAL TESTS

Viscosity, cSt at 40 deg C (before solvent)	220
Density @ 15 degC	.893
